How This Was Made 

- The recycled nylon in Nike products begins as a variety of materials, including recycled carpet and used fish nets. The nylon is cleaned, sorted, and converted into flakes before undergoing chemical or mechanical recycling processes to create new, recycled nylon yarns.
- Garments that use materials made from recycled nylon reduce carbon emissions by up to 50% compared to virgin nylon.
- Learn more about our [Move to Zero](#) journey towards zero carbon and zero waste, including how we're working to design product with sustainability in mind and help protect the future of where we live and play.
